DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

> A person shall be entitled to a patent unless –
>
> (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
> (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1, 7 and 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Vasudevan, US 5,776,883. See Example 9. It is clear from context that the word "Dextran" in the table is a typo.

3. Claims 1, 7 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Carter et al., US 4,711,740. See Example 4, where the polymer is P2.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. The factual inquiries set forth in *Graham* **v.** *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 1, 7 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vasudevan, US 5,776,883. The claims are obvious because they are anticipated.

8. Claims 1, 7 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Carter et al., US 4,711,740. The claims are obvious because they are anticipated.

Claims 1, 7, 9 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Weber et al., US 4,634,544. The reference discloses detergent compositions for colored fabrics. The detergent compositions comprise a water soluble polymer. The polymer

may be a polyacrylamide with a molecular weight of several million (col. 2, lines 44+) which has been partially hydrolyzed to afford carboxyl groups. The polymer is present at 1-15% by weight of the composition, preferably 2-6% (col. 3, lines 14+). A suitable nonionic surfactant is a fatty alcohol or a fatty amine ethoxylated with 2-40 moles, preferably 2-20 moles of ethylene oxide. Coconut alcohol ethoxylated with 5-16 moles of ethylene oxide is disclosed as particularly important. Use of combinations of nonionics is disclosed (col. 3, lines 46+). This reference differs from the claimed subject matter in that it does not disclose a composition which reads on applicant's claims with sufficient specificity to constitute anticipation.

It would have been obvious at the time the invention was made to make such a composition, because this reference teaches that all of the ingredients recited by applicants are suitable for inclusion in a surfactant composition. The person of ordinary skill in the surfactant art would expect the recited compositions to have properties similar to those compositions which are exemplified, absent a showing to the contrary.

In the case where the claimed ranges overlap or lie inside ranges disclosed by the prior art, a *prima facie* case of obviousness exists. *In re Wertheim,* 541 F.2d 257, 191 USPQ 90 (CCPA 1976); *In re Woodruff,* 919 F.2d 1575, 16 USPQ2d 1934 (Fed Cir. 1990).

Allowable Subject Matter

9. The previous indications of allowability are WITHDRAWN. Claims drawn to compositions comprising copolymers comprising acrylamide groups *and* N-oxide groups would be allowable. The examiner regrets the confusion.

10. Claims 13 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

11. The following is a statement of reasons for the indication of allowable subject matter: The closest prior art of record is the references relied upon above. None of these references discloses or motivates the addition of a dye fixative or any of the polyamines recited in claim 14.

12. This action contains new grounds of rejection which were not necessitated by applicant's amendments. Accordingly, it is NOT FINAL.

13. Any prior art made of record and not relied upon is of interest and is considered pertinent to applicant's disclosure.

14. Any inquiry concerning this communication or earlier communications from the examiner should be directed to the examiner, Dr. John R. Hardee, whose telephone number is (703) 305-5599.
